A smaller side door brought them to a check in counter topped by a glass partition behind which the attendant and a watchman were playing cribbage across a scratched and battered metal desk. The attendant stood and shuffled over when Jay and Pernak appeared, and Jay presented a school pass which entitled him to free use of the facilities. Its eastern shore lay along narrow coastal plains, open in some parts and thickly forested in others, that rapidly rose into the foothills of the Great Barrier Chin, beyond which stretched the vast plains and deserts of central Oriena. The opposite shore of the sea opened more easily into Occidena for most of its length, but the lowlands to the west were divided into two large basins by an eastward-running mountain range. An extension of this range projected into t. he sea as a rocky spine of fold valleys fringed by picturesque green plains, sandy bays, and rugged headlands, and was knows as the Mandel Peninsula, after a well-known statesman of the 2010s. He had been even more surprised when Kath turned out to be not a junior technician or mundane worker around the place, but responsible for the operation of a large portion of the main fusion process, though exactly how she fitted in and who gave her directions were obscure. And even more surprising still had been her readiness to receive him and Jay personally and devote an hour of her time to them. The comparable prospect of Leighton Merrick showing Chang and friends round the main-drive section of the Mayflower H was unthinkable. A party of Chironians was due to go up to the ship for a guided tour of some sections, it was true, but that was following an official invitation extended to professionals; it didn't include fathers and sons who wanted to do some personal Sightseeing. Perhaps his position as an engineering officer specializing in fusion techniques had had something to do with his special

"We could hardly disguise our scientific work," she said. "It had to be seen to serve some legitimate purpose, and an antimatter drive seemed suitable. But the Kuan-yin project has been low down on our list of priorities."
